Macromedia Fireworks

Introduction

Introduction Macromedia Fireworks is a leading professional graphic design package. Users can create all sorts of images for use in marketing material, presentations and web-pages.

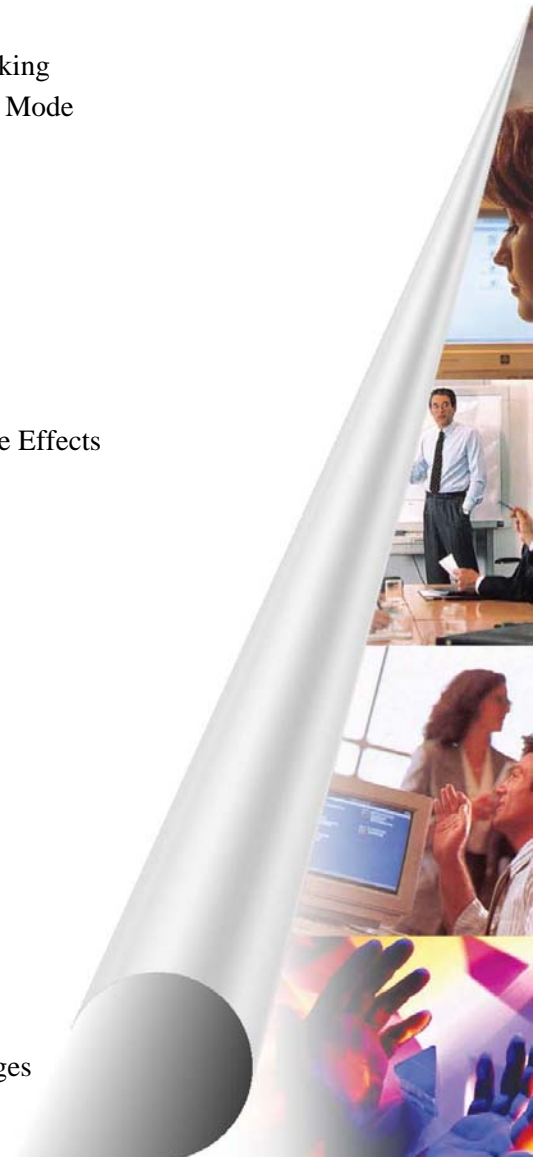

Objectives Upon completion of this course, the trainees will be able to create graphics with both vector and bitmap images, apply special effects, build buttons, add rollovers, create an animated GIF, optimise images and create pop-up menus.

Designed for People wishing to incorporate easy-to-use functionality in their web pages. They should be familiar with the Windows operating system and have in-depth knowledge of web development.

Duration 1 day
